## ***Silversea Cruises orders three new ships***

Continuing its growth in both its classic and expedition fleets, Silversea Cruises announced it will build three new ships for arrival in the early 2020's. Two luxury ships will join as a part of the new Evolution-class with the first being launched in 2022. A new expedition vessel named *Silver Origin* and accommodating 100 guests will enter service in the Galapagos Islands in March 2020. Two other ships in the Muse-class, the *Silver Moon* and *Silver Dawn*, will be sailing in a few years and the *Silver Spirit* recently underwent a major refurbishment and was lengthened by 49 feet.

## **Reviving 19th-century glory days on America's rivers**

American Queen Steamboat Company blends the romance of the past with modern amenities on its three river boats sailing the Mississippi, the Pacific Northwest as well as the Ohio, Tennessee and Cumberland rivers. Guests can enjoy award-winning shore excursions narrated by knowledgeable local guides, and each ship has an all-American crew on board providing great dining options and a wide array of entertainment. The flagship is the iconic paddlewheel steamboat, the *American Queen*, with sister ships *American Empress* and *American Duchess* rounding out the fleet.
